RED ROCK RURAL WATER SYSTEM

DRINKING WATER IS SAFE

DRINKING WATER PROBLEM CORRECTED

What should I do?

The Boil Water Advisory has been lifted. Water samples were taken July 21, 2025. The results were received July 23rd at 9:49 a.m. and No coliform bacteria was found. The water is safe to drink and meets EPA drinking water standards. You may want to run a cold-water faucet for several minutes or until the water is noticeably colder.

What happened?

We notified consumers via our website on July 21, 2025 of the loss of pressure due a damaged water main and issued a Boil Water Advisory. We are pleased to report that we have completed the repair project. **The Drinking Water Boil Advisory has ended.** We apologize for any inconvenience this may have caused and thank you for your patience..

What may be the health effects?

The incident is resolved and we do not expect any health effects. However, if you experience unusual symptoms and they persist, it is recommended you seek medical advice. People at increased risk should seek advice from their health care providers about drinking water.
