

The Red Rock Rural Water System is issuing a water use advisory for the entire water system including the rural members and Cities served by Red Rock.

Red Rock has received notice from the Minnesota Department of Natural Resources that our system area and the entire state is under a Severe Drought Warning Phase. There is currently not a shortage of water; however, we would like all rural water members to exercise good water use habits during this drought event. Please restrain from any unnecessary water uses such as lawn watering, washing cars and equipment or other outside uses that are not necessary at this time. This practice alone will provide Red Rock an estimated 15% reduction of total water used and will keep us within the requirements of the MN State Drought Plan. If you must use larger amounts of water, please do so between 9:30 p.m. and 6:00 a.m.

Water Conservation is always encouraged and is very much appreciated by the Red Rock Rural Water System. Please call us at 628-4201 if you have any specific questions. More information is online at [www.redrockruralwater.com](http://www.redrockruralwater.com) or the new Facebook page (<https://www.facebook.com/RRRWSystem>).
